

## Using Atomberg Fan with Amazon Alexa

\*\*Amazon Alexa app should be installed even before the fan is set up in the Atomberg App, else, user will have to remove the fan from Atomberg App and reset using step 4 of "Steps to add fan in the Atomberg App" from "Concern regarding Atomberg App" brochure.

- Atomberg fan works with voice commands using Amazon Alexa. (by both device or by application)
- To set up the device with Amazon Alexa, user must connect it with their smartphone using Amazon Alexa app and it's network should be same as that of fan's network.
- Go to Amazon Alexa app on smartphone.
- Go to the devices tab.
- Select "User Smart Home Skills".
- Click on "Enable Smart Home Skills".
- Search "Smart Life" and enable it.
- User needs to login with credentials that the user used while logging in with Atomberg App.
- After that the authenticated user will be able to see the device added in the device list of Amazon Alexa app.
- Now Atomberg fan is ready to be controlled using Amazon Alexa app.

sample commands to use with Google Assistant are given below please check

Alexa Switch On / Off  
Atomberg Fan

Alexa set Atomberg Fan at  
speed 1 / 2 / 3 / 4 / 5 / 6  
(6 is Boost Mode)
