

Setting Up user's smart home

1 STEP

- Launch Atomberg App and click on Signup in case of new user or login in case of existing user.
- For New User: Fill in signup information and password. A verification code will be sent on users registered mobile number for confirmation

****Google Home and Amazon Alexa app should be installed even before the fan is set up in the Atomberg App, else, user will have to remove the fan from Atomberg App and reset using step 4 of "Steps to add fan in the Atomberg App"**

- Existing users can enter mobile number and password for the login. In case the user forgets the password, user can login using an OTP, which will be sent on the registered mobile number.

2 STEP

- New users need to create a smart home by entering the family name and family location.
- User can select the number of rooms that they want to add in their smart home as per the requirement.
- Once family is created, user can now view home page where they can view, control, monitor and/or manage the Atomberg Fan(s) added to the family.
- User can create multiple families and can switch between families using drop down menu at the top left corner of the home screen. For creation of family, refer Home Management section.

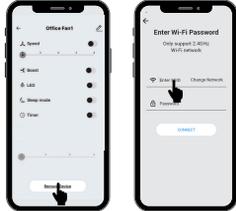

3 STEP

- Connect your device to the power source and turn it on
- Open the App, select "+" at the bottom center of the home page to add a device.
- Make sure the device is in net-pairing status: If you are unsure that the device is in net pairing status, then follow the adding fan's steps as mentioned below.

Steps to add fan in the Atomberg App

<h3>1 STEP</h3>	<ul style="list-style-type: none"> • Open Atomberg App. • Select family in which device needs to be added. Click on Plus (+) icon at the bottom of the screen • Enter or select the Name and Password of the Wi-Fi network. Click on 'Connect'. • Wait for few seconds until the connection is established between the fan and the Wi-Fi network. 	
<h3>2 STEP</h3>	<ul style="list-style-type: none"> • In case the user is connecting the App with the Atomberg Fan for the first time, no set up is required, but if fan connection needs to be reset then refer to the Step 4. • Make sure 2.4GHz Wi-Fi network is present in mobile on which the Atomberg App is installed, and it must be connected to the same Wi-Fi network. • Make sure that the fan is switched ON. 	
<h3>3 STEP</h3>	<ul style="list-style-type: none"> • After the connection is established, user can see the list of connected Atomberg fan. • User can assign the fan a name of user's choice and add it to a room. • Now user can see added device on user's family home screen, listed under the room or under 'All device' tab. 	
<h3>4 STEP</h3>	<ul style="list-style-type: none"> • User needs to reset the fan in case they face any connection error at start or after changing the Wi-Fi router/password. • Fan connection can be reset using app. • Press 'Remove Device' in device control to reset the Wi-Fi connection. • To reset the connection manually, follow the steps using the remote control:- <ol style="list-style-type: none"> 1. Turn off the fan using the remote. 2. Then press the LED button on the remote until the LED blinks. • A fast rotating LED pattern can now be observed. • Now instructions from step 1 can be followed in order to add the fan in Atomberg App. 	

If it still remains unresolved, please follow the steps mentioned below

<p>1 STEP</p>	<p>Make sure the device, the phone, and the Wi-Fi Router are close to each other and Wi-Fi is connected to an active internet.</p>	
<p>2 STEP</p>	<p>Make sure the router and its SSID (username & password) are correct.</p>	
<p>3 STEP</p>	<p>Make sure the device has been added using 2.4GHz Wi-Fi band.</p>	
<p>4 STEP</p>	<p>Enable the Wi-Fi Broadcast function and do not set it to hidden mode.</p>	
<p>5 STEP</p>	<p>Make sure the encryption method of router's wireless setting is WPA2-PSK, and the authentication type is AES, or both are set as automatic.</p>	
<p>6 STEP</p>	<p>11n only is not allowed in wireless mode.</p>	
<p>7 STEP</p>	<p>Make sure the Wi-Fi name does not contain any Chinese characters.</p>	
<p>8 STEP</p>	<p>If the number of devices connected to the router reaches the limit, try to turn off some devices and connect the fan again.</p>	
<p>9 STEP</p>	<p>If the router has enabled the wireless MAC address filter, try to remove the device from the router's MAC filter list to ensure the device is not prohibited by the router to connect to the network.</p>
