

Is Your Fan Not Working?

<p>1 STEP</p>	<p>Ensure that the connection is proper while plugging the Power Pin to the main socket. In case of loose connection, find another compatible socket.</p>	
<p>2 STEP</p>	<p>Check whether the fan is working with the manual switches. If yes, then the problem lies with the remote. Else, contact Atomberg's service team. Note - If you face any issues with the remote, kindly refer the troubleshooting steps of the same.</p>	
<p>3 STEP</p>	<p>Install the blade according to the provided pin-slot with the blade pin as shown in image.</p>	
<p>4 STEP</p>	<p>Make sure the remote you are using is same as that shown in the image.</p>	
<p>5 STEP</p>	<p>Crosscheck the efficacy of remote keys by using a mobile camera as shown in figure. On pressing the keys, If the LED lights of the remote are not glowing then the remote keys are not working.</p>
