www.atomberg.com
In our new identity, an open lock doubles up as the letter ‘A’ for Atomberg, it symbolises our ability to unlock solutions to invisible problems. The brand line sums up our approach.
Atomberg is in the business of solving ‘real’ problems using smart technology.

How do we do it?

By asking questions. The right questions.

“What would a typical day in our customers’ lives be like?”

“How can we make their days easier?”

Such questions help us focus on the things that really matter. Things like the latest technology, innovation and sustainability.

We then use these tools to design products with some amazing features. Imagine a ceiling fan that can be controlled using a mobile phone, or one that consumes up to 65% less electricity!

We don’t just stop there. We make sure that the entire customer journey (from installation to after-sales service) is as delightful as our products.

But don’t take our word for it. Ask over one million happy Atomberg customers!

So we have decided to keep asking newer questions... and finding newer answers!

Which everyday problem do you want us to solve next?
REVOLUTIONARY BLDC TECHNOLOGY

THE POWER BEHIND ATOMBERG FANS

BLDC stands for Brushless Direct Current. The motor runs because of an interaction between a single winding and strong permanent magnets. The commutation is deployed by smart electronics. Thanks to the BLDC inverter technology and our proprietary sensorless algorithm, Atomberg fans consume just 28W at full speed.

ADVANTAGES

- Elimination of friction and associated power losses
- Proprietary algorithm with smart electronics drive that runs the motor efficiently
- Less noise and no motor heating

Power consumption at each speed

The power consumption of the Atomberg Renesa+ fan varies with the speed at which it is set. It consumes less power than an LED bulb at speed 1.

**CUSTOMER TESTIMONIALS FROM ONLINE PORTALS**

---

**B2B TESTIMONIAL**

---

**TESTIMONIAL BY IIIT, HYDERABAD**

We, at IIIT Hyderabad, first bought 240 energy-efficient BLDC fans from Atomberg Technologies in June 2016. The performance of the fans has been satisfactory. We have not faced any issues with respect to performance and service so far. Use of these fans resulted into substantial power savings for us. Satisfied with the performance, we have also given them a repeat order of 230 fans in May 2017. Many faculty and staff members have also opted for these fans for their personal use at home. Going forward, we plan to install a greater number of BLDC fans in our campus.

CUSTOMER TESTIMONIALS FROM ONLINE PORTALS

HIGHEST RATED AND REVIEWED FAN ON ONLINE PLATFORMS

††††† Create BLDC Fan
Reviewed in India on 23rd November 2016
Verified Purchase

I bought a create BLDC fan from social media, and finally decided to test one before replacing all my old, energy-starved ceiling fans. My hands-on experience with Atomberg fans was excellent. The fan gives more breeze than a normal ceiling fan. It’s silent operation and energy-efficient construction amazed me very much. The speed regulation can be done with the remote control, and hence, no separate fan bed switch needed either. I didn’t have a single unsatisfactory experience with this product.

††††† Energy Efficient and Low NOISE.
Reviewed in India on 2nd January 2017
Verified Purchase

I first bought one to see its look and performance. I found it very quiet, yet giving the same air delivery as regular fans. I liked the design as well. Later, I purchased 2 more fans, and now all of my bedrooms have Atomberg fans. Recently, I had a fungus attack, and my guests liked the fans. The remote is an added advantage.

††††† Really good performance while saving electricity.

I first bought one to see its look and performance. I found it very quiet, yet giving the same air delivery as regular fans. I liked the design as well. Later, I purchased 2 more fans, and now all of my bedrooms have Atomberg fans. Recently, I had a fungus attack, and my guests liked the fans. The remote is an added advantage.

B2B TESTIMONIAL

TESTIMONIAL BY IIIT, HYDERABAD

We, at IIIT Hyderabad, first bought 240 energy-efficient BLDC fans from Atomberg Technologies in June 2016. The performance of the fans has been satisfactory. We have not faced any issues with respect to performance and service so far. Use of these fans resulted into substantial power savings for us. Satisfied with the performance, we have also given them a repeat order of 230 fans in May 2017. Many faculty and staff members have also opted for these fans for their personal use at home. Going forward, we plan to install a greater number of BLDC fans in our campus.

THE PERFECT BLEND OF STYLE & SAVINGS

UNMATCHED FEATURES

ENERGY-EFFICIENT BLDC MOTOR
SILENT OPERATION WITH HIGH AIR DELIVERY
SAVES UP TO ₹1500 IN A YEAR
RUNS 3X LONGER ON INVERTER
SMART REMOTE WITH BOOST, SLEEP AND TIMER MODES
100% PURE COPPER MOTOR FOR A LONGER LIFE
POWERFUL BOOST MODE
CONSISTENT SPEED EVEN AT LOW VOLTAGE WITH ZERO MOTOR HEATING

SMART REMOTE
WITH BOOST, SLEEP AND TIMER MODES
REVOLUTIONARY
BLDC TECHNOLOGY

THE POWER BEHIND ATOMBERG FANS
BLDC stands for Brushless Direct Current. The motor runs because of an interaction between a single winding and strong permanent magnets. The commutation is deployed by smart electronics. Thanks to the BLDC inverter technology and our proprietary sensorless algorithm, Atomberg fans consume just 28W at full speed.

ADVANTAGES
- Elimination of friction and associated power losses
- Proprietary algorithm with smart electronics drive that runs the motor efficiently
- Less noise and no motor heating

Power consumption at each speed
The power consumption of the Atomberg Renesa+ fan varies with the speed at which it is set. It consumes less power than an LED bulb at speed 1.

Atomberg is in the business of solving ‘real’ problems using smart technology.

How do we do it?

By asking questions. The right questions.

“What would a typical day in our customers’ lives be like?”

“How can we make their days easier?”

Such questions help us focus on the things that really matter. Things like the latest technology, innovation and sustainability.

We then use these tools to design products with some amazing features. Imagine a ceiling fan that can be controlled using a mobile phone, or one that consumes up to 65% less electricity!

We don’t just stop there. We make sure that the entire customer journey (from installation to after-sales service) is as delightful as our products.

But don’t take our word for it. Ask over one million happy Atomberg customers!

So we have decided to keep asking newer questions... and finding newer answers!

Which everyday problem do you want us to solve next?
In our new identity, an open lock doubles up as the letter ‘A’: A for Atomberg. It symbolises our ability to unlock solutions to invisible problems. The brand line sums up our approach.
Why not be in total control?

Atomberg Technologies Pvt Ltd
