

## Does The Speed Of Your Fan Vary?

<p><b>1</b> STEP</p>	<p>Regulator bypassing is recommended.</p>	
<p><b>2</b> STEP</p>	<p>Ensure that the supply cable (Red &amp; Black - Phase &amp; Neutral) are properly connected with the White OC connector.</p>	
<p><b>3</b> STEP</p>	<p>Ensure that the blades are adjusted to their corresponding motor i.e. 900mm (sweep size) blades should not be fixed to a motor of a 1400mm (sweep size) fan.</p>	
<p><b>4</b> STEP</p>	<p>We recommend the use of D-type hooks. If any other type of hook is in use, then ensure that down-rod must not have any movement while the fan is running.</p>	
<p><b>5</b> STEP</p>	<p>Ensure that the minimum adjacent distance between 2 fans should be more than 1 metre.</p>	 <p>How to space 2 fans equidistantly in a room Room Example 17' x 15' (drawn to scale)</p> <p>17 feet (204")</p> <p>1/4 of room    1/4 of room    1/4 of room    1/4 of room</p> <p>Center of Fan    Center of Room    Center of Fan</p> <p>Equal Space    Equal Space    Equal Space    Equal Space</p> <p>Center each fan at 1/4 the distance of the entire room width. In this case 5' (17 feet x 12 inches per foot divided by 4 = 5.25 inches)</p> <p>Equalized Spacing Viewed "Looking Up" at ceiling</p>
